Roles & Features Overview

Access rights · Player popups · Dashboard improvements

May 2026 · Confidential

1. Roles

Each user is assigned exactly one role. Roles control which navigation items and dashboards are visible.

GM	General Manager. Strategic oversight. Access to Wellness, Medical, Performance, User Management.
Headcoach	Head Coach. Broadest access of all roles incl. exclusive App Usage Statistics.
Athletic Trainer	Athletic Trainer. Focus on load & conditioning. Wellness, Nutrition, Performance, Medical dashboards.
Therapist	Physiotherapist. Player health & rehab. Wellness, Performance, Medical dashboards.
Coaching Staff	Assistant coaches, analysts. Full coaching view — no User Management.
Organisation Staff	Club admin. User Management only — no player health data.
Player	Athletes. Self-reporting popups (Wellness, RPE, Weight) + personal stats only.

2. Feature Matrix

✓ = full access · = no access ▲ = auto-popup (Players only) ★ = exclusive ■ = super-admin flag required

3. Player Popups (Auto-triggered)

Three popups appear automatically for Players based on calendar events. Data visible to Headcoach, Athletic Trainer & Therapist only.

■ Daily Wellness Check

■ Triggered every day on first login if not yet submitted

Step 1 — Always shown

1	Fatigue level today	Scale 1–10
2	Sleep quality & duration	Scale 1–10
3	Appetite	Scale 1–10
4	Any illness symptoms today?	Yes / No
5	Overall body pain level	Scale 1–10 (1=no pain)

Step 2 — Conditional · Condition: Shown if illness=Yes OR pain ≥ 4

1	Which illness symptoms?	Multi-select: Headache, Fever, Sore throat, Cough, Runny nose, Nausea, Fatigue/Malaise, Other
2	Body temperature	Number (°C)
3	Where do you have pain?	Multi-select: 11 body parts + Other

Step 3 — Conditional · Condition: "Other" body part selected in Step 2

1	Describe your pain or concern	Free text → sent directly to Athletic Trainer & Therapist
---	-------------------------------	---

■ Visible to Headcoach, Athletic Trainer & Therapist only

■ Session RPE

■ Triggered automatically after Ball-Practice or Game events start

Step 1 — Always shown

1	How hard was the overall session?	Scale 1–10 (1=very easy, 10=maximal effort)
2	Session duration	Number (min) — pre-filled from calendar, player can adjust

■ Visible to Headcoach, Athletic Trainer & Therapist only

■ Weekly Body Weight

■ Triggered once per week after a Weightlifting event

Step 1 — Always shown

1 Body weight

Number (kg) — measured by Athletic Trainer or Medical Staff

■ Visible to Headcoach, Athletic Trainer & Therapist only

4. Dashboard Features — Implementation Status

Status of the 7 Dashboard improvement proposals. #1–#6 are fully implemented. #7 (This Week) is still pending.

#1		Done
Next upcoming event shown at top of Schedule card with live countdown ('in 2h 30m') and category colour dot. Files: Dashboard.jsx — nextEvent derived from events state · Dashboard.module.css .nextUpBlock		
#2		Done
Progress bar '8 / 12 submitted today' shown above alert list. Only for WELLNESS_ALERT_ROLES. Files: Dashboard.jsx — wellnessProgress from Promise.all · Dashboard.module.css .wellnessProgress		
#3		Done
Players see last RPE score, 7-day wellness average, and next event in a mini-card at top of Dashboard. Files: Dashboard.jsx — PlayerSummaryCard component + player-role queries in load()		
#4		Done
Dismissed announcements are saved to announcement_reads table — synced across all devices. Files: Dashboard.jsx — dismissAnnouncement() upserts to Supabase, annReadsData loaded on startup		
#5		Done
Each event row shows In / Maybe / Out buttons. Optimistic state update, upserts to event_participants. Files: Dashboard.jsx — handleRsvp() · Dashboard.module.css .rsvpBtnGroup / .rsvpBtnInline		

# 6		Done
Tasks are now matched by assigned_to UUID column — no more duplicate-initials or name-change bugs. Files: Dashboard.jsx — .eq('assigned_to', currentUserId) in tasks query		
# 7		Pending
upcomingByDate data is computed in Dashboard.jsx but the render section is not implemented yet. A collapsible section below today's schedule would expose the 7-day event data already in state. Files: Dashboard.jsx — add weekSection render + Dashboard.module.css .weekSection
